

Project Demo Planning

Date	5 July 2026
Team ID	XXXXXX
Project Name	AI Learning Support Assistant
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the project, explain the challenges students face while learning, and describe the motivation for building an AI-powered learning support assistant.	2	Y.sreeRohitha
2	Solution Overview	Explain the system architecture, technologies used (Streamlit, BiLSTM, BERT, Google Gemini API, Plotly), and the overall application workflow.	3	B.Niharika
3	Live Feature Demonstration	Demonstrate subject selection, learning problem input, BiLSTM and BERT emotion prediction, mixed emotion detection, Gemini AI learning guidance, interaction history, and analytics dashboard.	7	SK.Farook
4	Analytics & Previous	Demonstrate the Plotly analytics dashboard, previous interaction viewer, CSV download, and	2	Y.sreeRohitha

	Interaction	summary statistics.		
5	Testing & Performance Validation	Present Epic 6 testing results, model caching, responsiveness, cross-browser compatibility, and application performance.	2	SK.Farook
6	Conclusion & Future Enhancements	Summarize the project outcomes, highlight completed features, discuss possible future improvements, and answer audience questions.	2	B.Niharika

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the purpose of the AI Learning Support Assistant and the problem it solves for students.
2	Solution Overview	Present the application architecture, AI models, Google Gemini integration, and overall workflow.
3	Live Feature Demonstration	Show the complete user workflow: subject selection, learning problem input, emotion prediction, AI-generated guidance, interaction history, and analytics dashboard.
4	Q&A Session	Respond to questions about implementation, testing, technologies used, and project outcomes.
