

Project Initialization and Planning Phase

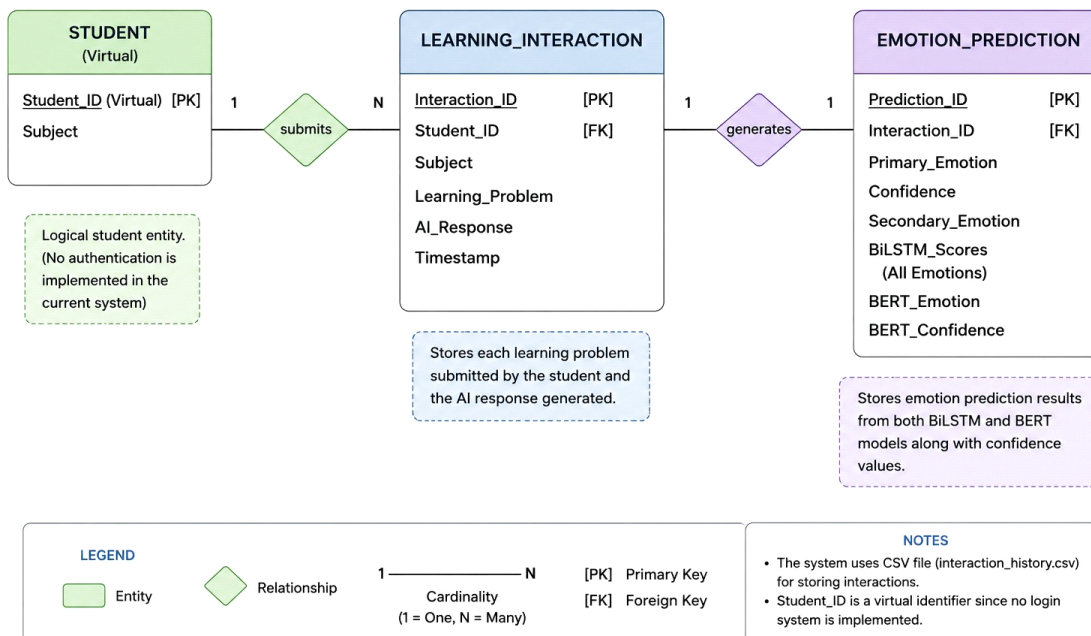

Date	15 March 2024
Team ID	xxxxxx
Project Name	AI Learning Support Assistant
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

The AI Learning Support Assistant is designed to understand students' emotional state while learning and provide personalized academic guidance. The following customer problem statements identify the major challenges faced by students and explain how the proposed solution addresses them.

Example:

ER DIAGRAM – AI LEARNING SUPPORT ASSISTANT

Problem Statement	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A student learning Computer Science.	Understand difficult programming concepts.	I struggle to understand topics like Binary Search and algorithms.	Traditional learning resources do not adapt explanations to my learning difficulties.	Confused and frustrated.
PS-2	A student studying for examinations.	Learn difficult subjects effectively.	I cannot easily identify why I am struggling with a topic.	Existing learning platforms provide the same explanation to everyone.	Anxious and less confident.
PS-3	A self-learning student.	Receive immediate academic guidance.	I don't always have a teacher available to answer my questions.	I study independently most of the time.	Stuck and demotivated.
PS-4	A student using AI for learning.	Get personalized learning support.	Most AI tools answer questions but do not understand my emotional state.	They focus only on providing answers instead of emotion-aware guidance.	Unsupported while learning.
PS-5	A student using this application.	Track my previous learning sessions.	I forget what I learned and cannot remember previous recommendations.	I need a record of my earlier interactions and AI responses.	Unorganized and uncertain about my progress.
PS-6	A student facing repeated learning difficulties.	Improve my understanding over time.	I don't know whether my learning confidence is improving.	There is no simple way to visualize my learning progress.	Unsure about my improvement.
